BrightPath Tech

BrightTrial - Fast, affordable trial management in the cloud

RFP reference	Issued by	Submission date	Contact
RFP-CTMS-2026-014	Helixpharm Therapeutics (fictional sponsor)	28 September 2026	Daniel Okafor, Head of Sales (fictional)

1. Executive Summary and Understanding of the Requirement

BrightPath Tech thanks Helixpharm Therapeutics (fictional sponsor) for the opportunity to respond to RFP-CTMS-2026-014. We understand you want to move off an old on-premise CTMS onto a modern cloud platform that connects to your document, data capture and finance systems, and to do it quickly.

BrightTrial was launched in 2023 and is already used by two growing biotech companies. Our proposition is simple: a modern user experience, the lowest total cost in this procurement, and a go-live in seven months. We believe speed and cost should not be traded away for features that most teams never use.

Our team has strong software engineering credentials and we are keen to grow in the pharma market. We see this engagement as a strategic partnership and have priced it accordingly.

2. Proposed Solution and Implementation Approach

BrightTrial is a cloud-native application built on a modern microservices stack. It manages studies, sites, contacts, monitoring visits and enrolment tracking with configurable dashboards. The interface is mobile friendly and requires minimal training.

Integrations

BrightTrial integrates with all major eTMF, EDC and ERP systems through our flexible integration layer. Standard file-based and API-based options are available. Specific connectors for the sponsor's systems will be scoped during the discovery phase once we have access to the technical documentation.

Site payments

Visit-based payment calculations are supported. Payment files can be exported in CSV format for upload into the sponsor's finance system. Automated posting to SAP can be explored as a future enhancement.

Reporting

Eight standard dashboards are included. Additional reports can be built by the sponsor using the built-in report designer.

3. Timeline, Team Structure and Milestones

We propose a single go-live (big-bang) approach over seven months. Running one cut-over avoids the cost and confusion of operating two systems in parallel.

Phase	Activities	Months
Discovery	Requirements workshops, integration scoping	1
Configure	Study templates, dashboards, user setup	2-3
Migrate	Bulk load of legacy data via CSV templates	4-5
Test and train	Sponsor UAT, train-the-trainer sessions	6
Go-live	Cut-over weekend, two weeks hypercare	7

Team

Project manager (1.0 FTE), two configuration consultants (2.0), one integration developer (0.5). Validation activities are the responsibility of the sponsor; we can recommend a third-party validation consultancy if required.

Risks

The main risk is sponsor availability for workshops and UAT. We ask for a committed sponsor project manager from day one.

4. Pricing and Assumptions

Pricing is in US dollars. Licence is per named user per year.

Item	Year 1	Years 2-5 (each)	5-year total
Subscription licence (150 users x $1,400)	$210,000	$210,000	$1,050,000
Implementation services	$520,000	-	$520,000
Integration services (discovery estimate)	$150,000	-	$150,000
Standard support	$45,000	$45,000	$225,000
Total	$925,000	$255,000	$1,945,000

- Assumes 150 named users; additional users at $1,400 per user per year.
- Integration services are an estimate pending discovery; final scope may change the price.
- Validation, if required, is excluded and would be delivered by a third party.
- Data migration assumes legacy data is provided in our CSV templates by the sponsor.

5. Security, Compliance and Risk Controls

BrightTrial is hosted on a leading public cloud provider with industry-standard security. Data is encrypted in transit and at rest. Access is controlled through user roles and passwords, with optional single sign-on.

Changes to key records are logged with user and timestamp. The platform is designed with regulatory requirements in mind, and we are working towards formal certification of our information security management system, expected within the next 18 months.

Backups are taken daily and retained for 90 days. Our hosting provider maintains physical and infrastructure security certifications.

6. Support Model, Relevant Experience and References

Support

Support is provided by email and web portal during business hours (09:00-18:00 UK time, Monday to Friday). Target first response within one business day. Two weeks of hypercare follow go-live.

Experience and references (fictional)

- Lumen Biosciences - BrightTrial deployment for 6 studies, 2024.
- Kestrel Bio - BrightTrial deployment for 4 studies in 2 countries, 2025.

Both customers are available as references. Our engineering team has prior experience building SaaS products in the fintech and logistics sectors.
