Orbit Digital

OrbitTrials CTMS - Ten years of clinical trial management expertise

RFP reference	Issued by	Submission date	Contact
RFP-CTMS-2026-014	Helixpharm Therapeutics (fictional sponsor)	3 October 2026	Tomas Lindqvist, Vice President Client Services (fictional)

1. Executive Summary and Understanding of the Requirement

Orbit Digital welcomes the opportunity to respond to RFP-CTMS-2026-014 from Helixpharm Therapeutics (fictional sponsor). We understand the sponsor seeks to modernise clinical trial management across roughly 40 studies and 12 countries, connecting the CTMS to document, data capture and finance systems and automating investigator payments.

Orbit Digital has delivered OrbitTrials CTMS to 15 pharmaceutical sponsors over ten years. Our track record in the industry is our strongest asset: our consultants have seen most migration pitfalls before and our client retention rate is 93%.

We propose a 13-month programme at a competitive mid-range price point, backed by a mature support organisation.

2. Proposed Solution and Implementation Approach

OrbitTrials provides comprehensive study, site, subject, monitoring and payment management with configurable workflows. The platform has evolved over a decade of client feedback and covers the full clinical operations lifecycle.

Integrations

OrbitTrials uses standard connectors to integrate with common clinical and enterprise systems. Integration with the sponsor's eTMF, EDC and finance systems will be achieved using these standard connectors, configured during implementation. Our experience across many client environments means most integration scenarios are familiar to us.

Site payments

Investigator payments are calculated from visit and procedure data and can be transmitted to the finance system through the standard connector. Approval workflows are configurable.

Reporting

Over thirty standard reports developed with clients over ten years, plus an ad-hoc reporting tool.

3. Timeline, Team Structure and Milestones

We propose two waves over 13 months. Wave 1 establishes the platform and migrates half the portfolio; Wave 2 completes migration and payments.

Wave	Scope	Months	Key outputs
1 - Establish	Platform setup, configuration, integration configuration, migrate 20 studies, training	1-7	Platform live for 20 studies
2 - Complete	Migrate remaining 20 studies, payments live, hypercare, legacy decommission	8-13	Full portfolio live; legacy retired

Team

Client partner (0.3 FTE), programme manager (1.0), two senior consultants (2.0), integration consultant (1.0), data migration consultant (1.0), training consultant (0.5). Our consultants average nine years of CTMS

experience.

Risks

- Sponsor data readiness - mitigated by our proven migration templates.
- Integration complexity - mitigated by our standard connector library and prior experience.

4. Pricing and Assumptions

Pricing is in US dollars. Licence is per active study per year.

Item	Year 1	Years 2-5 (each)	5-year total
Subscription licence (40 studies x $7,500)	$300,000	$300,000	$1,500,000
Implementation and migration services	$780,000	-	$780,000
Validation support	$150,000	-	$150,000
Integration configuration (standard connectors)	$170,000	-	$170,000
Standard support	$100,000	$75,000	$400,000
Total	$1,500,000	$375,000	$3,000,000

- Assumes 40 active studies; additional studies at $7,500 per study per year.
- Assumes integrations are achievable with standard connectors; custom development, if needed, is quoted separately at $1,600 per day.
- Travel billed at cost.

5. Security, Compliance and Risk Controls

OrbitTrials has supported regulated clinical operations for ten years and is built to meet applicable regulatory requirements including 21 CFR Part 11, with audit trails and electronic signatures on key records.

- Validation: we provide a validation starter pack (IQ/OQ templates) and support the sponsor's validation team; PQ is typically performed by the sponsor.
- ISO 27001 certified (fictional certificate OD-27001-2022-077).
- GDPR: we comply with applicable data protection regulations and offer a data processing agreement. Hosting is in US data centres; EU hosting can be discussed.
- Role-based access, encryption in transit and at rest, daily backups retained for one year.
- Annual third-party security assessment.

6. Support Model, Relevant Experience and References

Support

24x7 support for P1 incidents with a one-hour response target; P2 and below handled in business hours with a four-hour response target. Four weeks of hypercare after each wave. Availability commitment 99.5%.

Experience and references (fictional)

Fifteen pharmaceutical sponsors have deployed OrbitTrials over the past ten years, including:

- Greywell Pharma - 60 studies, 2016, still in production.
- Bellhaven Biologics - 25 studies, 2017.
- Sable Ridge Therapeutics - 45 studies, 2018.
- Carrow Oncology - 30 studies, 2019.
- Linden Vaccines - 20 studies, 2020.
- Whitlock Pharma - 35 studies, 2021.
- Faraday Biosciences - 15 studies, 2022.

- Oakhurst Therapeutics - 50 studies, 2023.
- Plus seven further sponsors available on request.

Any of these clients may be contacted as references. Several have hosted regulatory inspections during their use of OrbitTrials.
